C#@ACC

ITSE 1330 – C# Program10

General Points

- Use the course material located at:
    - [C# @ ACC](#)
- Program10 can be completed using content from the following chapters:
    - Welcome! through Windows Forms
- Create a Windows Forms application using Visual Studio named Program10.
    - Select Windows Forms App (.NET Core or Framework)
- Output appropriate results. In other words, all requirements should be output and identified by number.

Requirements

Requirements (these are the requirements to identify by _number_):

1. Include a label: "This is Program10"
2. For Program10, recreate Program07 (or 08) as a Windows Forms App.
3. Include appropriate controls to accept input from the user.
4. Include appropriate controls to message structure state and object state information back to the user.
5. Include appropriate controls to invoke the methods.
6. Include a MessageBox that displays: "Thank you for running Program10." when the application is closed (hint: consider the FormClosing() event).
7. Include a label or other obvious control to display a statement explaining your experiences with Program10. Make this authentic (minimum of 2-3 sentences).

TEST – TEST – TEST your application to ensure it meets requirements.

- Use the list above and the common requirements as a checklist.
- Not meeting all requirements = 0 points for the assignment.
